Certificate: **56-C-0281**
Site: 002
Wildlife Geeks

Type: ROUTINE INSPECTION
Date: 27-JUL-2023

2.75(b)(1)

Records: Dealers and exhibitors.

The facility did not have the required information and records for the acquisition of a Patagonian cavy and disposition of one rabbit. Acquisition and disposition records, including offspring born at the facility, are necessary to accurately track animals being used in regulated activities and maintained on the premises. The licensee shall make, keep, and maintain records of acquisition/disposition of all animals that fully and correctly disclose the required information. Correct by August 4, 2023.

3.52(a)

Facilities, outdoor.

The rabbit at the facility was not provided with artificial cooling when the ambient temperature exceeded 90 degrees Fahrenheit. Though the outdoor enclosure provided shade from direct sunlight, the kestrel measured temperatures ranging from 91F - 93F at the time of inspection near this rabbit enclosure. Rabbits are sensitive to excessive heat. Lack of additional cooling when ambient temperatures are elevated can result in heat stress, extreme discomfort, or debilitating illness. The licensee shall provide artificial cooling such as a sprinkler system or other means when temperatures exceed 90 degrees Fahrenheit. The facility corrected during the inspection.

This inspection and exit interview were conducted with the licensee.
