Type: ROUTINE INSPECTION
Date: 10-AUG-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

2.40 (b) (2) The written Program of Veterinary Care (PVC) reviewed and signed on 05/21/2015 calls for the 4 adult dogs to received Drontal as an intestinal parasite preventative annually. There were no records available at the time of inspection showing that this was being done. The licensee stated that they are no longer giving Drontal annually, but needed to verify with the attending veterinarian. The current written PVC does not reflect what is actually being provided to the animals at the facility. Complete and accurate PVC is important to ensure there is an understanding between the licensee and the attending veterinarian, so that all routine preventative care and treatments are accomplished to protect the health and well-being of the animals.

Establish and maintain an accurate and complete written Program of Veterinary Care that includes the use of appropriate methods to prevent, diagnosis and treat disease or injuries.

To be corrected by: August 26, 2015

Inspection and an exit briefing were conducted with the licensee.
