Certificate: **56-A-0137**
Site: 001
CHARLOTTE CANNON

Type: ROUTINE INSPECTION
Date: 07-MAR-2016

3.4(c)

OUTDOOR HOUSING FACILITIES.

Five dogs are in the side yard and have access to steps and the back porch. Although this porch was cleaned and painted approximately six months ago, most of the paint has come off of the steps and it is thin in several areas on the porch. This is probably due to the amount of power washing and sanitizing. The porch and steps need to be resealed in order to be impervious to moisture. To be corrected by 4-8-16.

3.6(c)(1)(2)

PRIMARY ENCLOSURES.

All of the dogs are outside during the day when the weather is good, then brought into the house at night and during inclement weather. During this inspection, it was noticed that due to moving of animals into different enclosures, not all of the indoor crates were of sufficient size to meet the minimum floor space for primary enclosures. An example is two dogs each requiring 5 square feet of floor space were housed together in a crate providing 5.2 square feet of floor space. There are 14 dogs which are neutered and are no longer regulated. The plan is to rearrange the rest of the 15 dogs to be in crates or kennels which provide their required amount of floor space. To be corrected by 3-9-16.

Exit briefing conducted with licensee.
