

## Inspection Report

Temple University  
Medical Education & Research Building Rm 537  
3500 N Broad Street  
Philadelphia, PA 19140

Customer ID: 328  
Certificate: 23-R-0027  
Site: 001  
TEMPLE UNIVERSITY

Type: ROUTINE INSPECTION  
Date: 22-SEP-2016

### 2.31(d)(8)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

In IACUC approved protocol #4272, the stated that the animal would be anesthetized using ketamine HCl given in combination with the atropine sulfate, masked with isoflurane, intubated and maintained at a surgical level of anesthesia with isoflurane. According the facility's anesthesia logs, dates ranging from 11/5/2016 through 9/1/2016, the cats did not receive the pre-anesthetic combination listed in protocol instead they were anesthetized with only isoflurane without complication, as per the PI. The PI implemented the change in procedures based on scientific justification without prior IACUC approval. The IACUC should ensure that an animal procedure is conducted as described in the approved animal care and use proposal to avoid or minimize discomfort, pain and/or distress to the animals. Any significant changes should have IACUC approval prior to implementation.

TO BE COMPLETE BY: 7 October 2016

This inspection was conducted September 22-23 and September 26, 2016.

The exit interview was conducted on September 26, 2016 with the IACUC Chair and Attending Veterinarian
