3.131(c) Repeat

Sanitation.

The base of the metal entrance door of the bear/leopard holding building, has rusted through thus leaving small openings present. This rusted area covers approximately 1/3 the length of the base of the door and is approximately 2 1/2" in height. This damage leaves this door in disrepair. Additionally, the opposing door is missing half of its door sweep. The gap between the base of the door and the floor is large enough to allow the entrance of unwanted pests.

Rusted doors and missing portions of doors leave the building in disrepair.

Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart.

This inspection and exit briefing were conducted with the facility representatives.
