

Inspection Report

Jackson Zoological Society Inc
2918 West Capitol St
Jackson, MS 39209

Customer ID: **3004**

Certificate: **65-C-0101**

Site: 001

JACKSON ZOOLOGICAL SOCIETY INC

Type: ROUTINE INSPECTION

Date: 27-MAR-2014

3.75(c)

HOUSING FACILITIES, GENERAL.

**The shift door in the lion tailed macaque enclosure is rusted on the surface facing the outside. Wood around the door is chipped. Excessive rust and exposed chipped, unpainted wood can prevent effective sanitization of the surface or affect its structural strength which may affect the health of the animals.

**Peeling paint was observed on the perch support brackets within the chimpanzee enclosure as well as rust on doors of the enclosure. Peeling paint and rust cannot be effectively sanitized which may affect the health of the animals.

**Peeling paint was observed on the floor of th colobus enclosure. Peeling paint cannot be effectively sanitized which may affect the health of the animals.

Surfaces which come into contact with nonhuman primates must be free of excessive rust and maintained on a regular basis to promote effective cleaning and sanitization of the surface and preserve structural strength.

Correct by 5/1/2014.

The inspection and exit interview were conducted with the Deputy Director.
