East Dundee, IL 60118

Customer ID: 2388  
Certificate: 33-B-0185  
Site: 002  
APET INC (RECORDS ONLY)

Type: ROUTINE INSPECTION  
Date: 18-JAN-2018

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The Program of Veterinary care is dated for 2016 and does not list guinea pigs. Since the 2 guinea pigs noted in the card board boxes are being shipped back to site #1 to be put to sleep there has been no communication with the attending veterinarian. This was verified with a phone call to the AV who not notified of the sick and soon to be put to sleep guinea pigs. The licensee must have and the PVC updated and contact the AV about all sick animals. Correct within 48hrs

### 2.40(b)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The program of veterinary care lists that a C-o2 chamber may be used if animals need put to sleep. Currently and after talking with the attending veterinarian there in not a Co-2 chamber available. The program of veterinary must be followed as it was written by the AV. The licensee must provide a method of euthanasia as soon as possible. Correct within 48hrs

### 3.36(a)(1)

#### PRIMARY ENCLOSURES USED TO TRANSPORT LIVE GUINEA PIGS AND HAMSTERS.

2 live guinea pigs are being shipped in card board boxes. Cardboard boxes are not structurally sound enough to withstand the normal rigors of transportation. There is not enough sufficient air in these two card board boxes for the animals to breathe normally. The licensee must provide proper adequate shipping containers with sufficient air and be made of materials that are strong enough for the rigors of transportation.

Corrected during the inspection

## Inspection Report

---

### 3.36(a)

#### PRIMARY ENCLOSURES USED TO TRANSPORT LIVE GUINEA PIGS AND HAMSTERS.

There are 2 shipping containers with one guinea pig in each without the proper Live Animal Labels. They must be clearly posted on top and on one or more sides and with arrows or other markings to indicate the correct upright position. Cargo shipping containers must have these labels and markings so the animals are not in danger of the container being handled improperly. The licensee must have live animal labels on all shipments that contain USDA covered species under the AWA.

Correct within 24hrs

(The exit interview was conducted with an employee).
