Site: 001  
JAVON STACKS

Type: ROUTINE INSPECTION  
Date: 14-APR-2021

---

### 2.40(a)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The program of veterinary care states monthly preventative for ectoparasites will be used on wild and exotic animals including felids and canids. A discussion with the licensee revealed that he is not administering any monthly prevention. He stated he has ivermectin on hand but when asked how to use it, he did not know how to properly administer the medication. After a discussion with the attending veterinarian, the expectation is that the licensee will apply Frontline monthly. Each exhibitor shall assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

To be corrected by: 5-3-2021

### 2.132(d)

#### Procurement of dogs, cats, and other animals; dealers.

Upon record review, an acquisition form and health certificate were present for the purchase of a single male coyote. After a discussion with the licensee, it was determined that the seller did not possess a USDA license to sell wild and exotic animals. No exhibitor shall knowingly obtain any dog, cat, or other animal from any person who is required to be licensed but does not hold a current, valid, and unsuspended license.

To be corrected by: 4-20-2021

## Inspection Report

---

### 3.127(d)

#### Facilities, outdoor.

A portion of the perimeter fence surrounding the African crested porcupine and lynx enclosures is not six feet tall. All outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. The perimeter fence must be at least six feet high for non-dangerous animals.

To be corrected by: 5-15-2021

This inspection and exit interview were conducted with the licensee.
