#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

1. The oldest male degu was observed continuously tilting its head to the right while it moved through its enclosure. The degu's right eye was closed and would not open. Additionally, the area beneath its eye also appeared swollen. Finally, the degu was heard sneezing several times in a row during the inspection. This animal's condition has not been communicated to the facility's veterinarian as per the animal care manager.

This animal's condition must be reported to the facility's veterinarian. All veterinary instructions and/or prescribed treatments must be followed to provide for the health and well-being of the animal.

2. Another male degu was observed with a thick, white material completely covering its left eye. The facility animal care manager indicated that the animal has had this condition for some time. The condition of the degu's eye has not been reported to the facility's veterinarian.

This animal's condition must be reported to the facility's veterinarian. All veterinary instructions and/or prescribed treatments must be followed to provide for the health and well-being of the animal.

3. The facility acquired a groundhog approximately 2 months ago. The groundhog had some difficulty with its balance during the time of inspection. The facility animal care manager indicated that the groundhog was donated and that the donating facility indicated that the animal has neurological problems. This groundhog's issues have not been reported to the facility's veterinarian.

This animal's condition must be reported to the facility's veterinarian. All veterinary instructions and/or prescribed treatments must be followed to provide for the health and well-being of the animal.

The facility must report all issues to the veterinarian by 2-6-14

The inspection exit briefing was conducted with the facility animal care manager.
