Crete, NE 68333

Customer ID: **10331**

Certificate: **47-B-0102**

Site: 001

Kerry Rosenkrans

Type: ROUTINE INSPECTION

Date: 06-JUL-2015

3.78(b) REPEAT

OUTDOOR HOUSING FACILITIES.

Sec. 3.78 Outdoor housing facilities. (d) Perimeter fence.

* A section of perimeter fence on the backside has been taken down. There was cattle paneling on the backside. This paneling has large openings and is not 6 feet tall. This paneling could let in unauthorized humans and animals to go through it or under allowing for unauthorized contact to the two primates. The primates housing facility must have a perimeter fence that is 6 feet tall. The perimeter fence must be constructed so it protects the primates by restricting unauthorized humans and animals the size of dogs, skunks, and raccoons from going through it or under it. Therefore, preventing unwanted contact and protection that will be provided with the perimeter fence.

3.84(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Sec. 3.84 (c). Cleaning, sanitization, housekeeping, and pest control.

* There were tall weeds and grass around the enclosure housing two non-human primates. The tall weeds were approximately 1 to 3 tall. Premises must be kept free of tall weeds, grass and brush. This will facilitate cleaning of the premise and pest control. To include, reducing or eliminating breeding and living areas for rodents, pests and other vermin. As a result, a clean premise and pest control will reduce the disease hazards to the primates caused by rodents, pests and other vermin.

To be corrected by, 22-July-2015.

This inspection and exit interview was conducted with the facility representative.
