2252 E. 277th
Lyndon, KS 66451

Customer ID: **31385**
Certificate: **48-A-1932**
Site: 001
Lester Wagler

Type: ROUTINE INSPECTION
Date: 11-SEP-2014

3.1(a) REPEAT

HOUSING FACILITIES, GENERAL.

* Dug holes were observed in the dirt ground floor in one enclosure and next to the enclosure gate in another enclosure. Two dogs are in contact with the affected areas which are located in outdoor housing. The holes were estimated to be one foot wide by six inches deep. This affects the ability of enclosure fencing to contain the dogs securely. It could lead to potential injury affecting the safety and health of the dog. The licensee must keep facilities in good repair to protect the animals from injury and contain the animals securely at all times.

3.1(c)(2)

HOUSING FACILITIES, GENERAL.

* One carpet square has torn and shredded ends. The affected carpet square is attached to the entrance of one outdoor shelter structure. One adult dog and five puppies are in contact with the affected carpet square. Potential ingestion of the carpet exists which could lead to digestion problems. In addition the dog or puppies could become entangled in the torn, shredded ends causing potential injury. The licensee must keep housing facilities in good repair and protect the animals from injury at all times. Correct by 9/25/14.

* The facility inspection done on 9/11/14 and the exit briefing done on 9/18/14 were conducted with the licensee.
