Date: 26-SEP-2024

3.18(d) Critical

Care in transit.

At the time of inspection, the facility representative stated that on August 11, 2024, the driver of the transporter fell while walking a dog at rest stop in New York. This spooked the dog and the dog ran away. The driver was unable to catch the dog immediately. He stayed to look for the dog for hours however, the dog was not found. During transportation in commerce, a dog must not be removed from its primary enclosure unless it is placed in another primary enclosure that safeguards the dog from injury and prevents escape. The facility must determine a second primary enclosure that ensures the safety and protection of the animal when removed from the primary enclosure.

CORRECTION DATE: From this date 03 OCT 2024 and forward
