Certificate: **34-C-0371**

Site: 001

INDIAN CREEK INVESTMENT III,
L L C

Type: ROUTINE INSPECTION

Date: 03-OCT-2022

3.125(a)

Facilities, general.

An outdoor primary enclosure, housing 2 Bactrian camels, had a large gap in the fence. The gap was approximately 2-3 feet and extended upward from the ground. The gap in the enclosure fence is large enough for a camel to stick its head and neck through causing injury or entrapment.

Facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain them.

The licensee must fix the gap in the enclosure fence to prevent injury to the camels.

To be corrected by 10/10/2022

3.127(d)

Facilities, outdoor.

The facility exhibits dangerous animals thus requiring an 8-foot-tall perimeter fence. Approximately 120 feet of the perimeter fence was not the required 8-foot height. The shortest point of this affected area measured approximately 75.5 inches. There was an overgrowth of vegetation which was affecting the fence integrity causing it to bend downward. With an inadequate perimeter fence, animals and unauthorized persons can access the animals and may cause stress, transmit disease, injure, or release the regulated animals.

Inspection Report

All outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences must be at least 8 feet high for potentially dangerous animals such as large felines, bears, wolves, rhinoceros, and elephants and at least 6 feet high for other animals. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between the animals inside the enclosure and animals or persons outside the perimeter fence. Such fences shall be 3 feet in distance from the primary enclosure.

The licensee must ensure that outdoor housing facilities are enclosed by a perimeter fence that is of sufficient height and maintained in good repair to keep animals and unauthorized persons out.

To be corrected by 10/17/2022

This inspection and exit interview were conducted with facility representatives.
