Type: ROUTINE INSPECTION
Date: 19-OCT-2017

3.81(c)(4)

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

***The black and white ruffed lemur is singly housed and unable to hear or see other nonhuman primates. A written plan for environmental enrichment adequate to address his social needs and promote his psychological well-being must be developed in accordance with currently accepted professional standards. The plan shall be developed and maintained as directed by the attending veterinarian. Correct by November 19, 2017

3.127(b)

FACILITIES, OUTDOOR.

***There is no shelter from rain or cold provided for the pigs or for the capybara. A shelter must be provided for protection against inclement weather. As the season is changing the temperatures are now dropping into the low 50's at night the pigs and capybara will require a shelter that will protect them from the wind and cold as well as the rain thereby protecting them from discomfort.

***The house provided for the african porcupine is in disrepair. The wood has become worn and chewed at the entrance leaving the boards loose, weakened, and splintered which may allow the porcupine to become injured. The house shall be repaired or replaced.

Correct by October 27, 2017

3.127(d)

FACILITIES, OUTDOOR.

***The perimeter fence ranges from 4 to 5 feet in height. A perimeter fence no less than 6 feet in height is required for the exotic animals. The fence must be constructed no less than 3 feet from the enclosures so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. Correct by March 30, 2018.
