SAMUEL E & POLLY R BORNTAGER

Type: ROUTINE INSPECTION

Date: 08-OCT-2015

### 2.40(b)(2) DIRECT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A female Pekinese (#83) was holding up her left rear leg while standing and favored the left rear leg while walking. On closer observation, the inner middle pad on the left rear foot was reddened and swollen. There was a lesion in the middle of this swollen pad that went the width of the swollen pad. The edges of the of the lesion had yellowish skin around the edges. The licensee stated he noticed this dog limping a week or two ago. When asked if this dog was receiving treatment the licensee replied "no" and also said had not contacted their veterinarian about this dog. This dog is currently not receiving treatment and is currently showing signs of discomfort. This dog's condition could be due to injury, infection and/or another veterinary medical condition which could be painful. The licensee must have this animal examined by a licensed veterinarian in order to ensure that an accurate diagnosis is obtained and an appropriate treatment plan is developed and followed. The licensee must ensure that all animals receive adequate veterinary care at all times.

To be corrected by: October 10, 2015.

Inspection and exit interview conducted with licensee and Chad Proctor ACI. Verbal instructions to have this dog seen by a veterinarian were giving at the time of inspection.
