Certificate: **74-R-0029**

Site: 001

The University of Texas at Austin - ARC

Type: ROUTINE INSPECTION

Date: 05-FEB-2015

2.38(f)(1)

MISCELLANEOUS.

Approximately two months ago, a macaque escaped his primary enclosure while being shifted for transport. As a result, the animal acquired a laceration which required veterinary treatment. Since this incident ,modifications have been made to the shifting method to prevent escape and employees have received training in the modification. CORRECTED AT TIME OF INSPECTION.

The inspection and exit briefing was conducted with the attending veterinarian , staff veterinarian and technicians.

Additional Inspectors

Shaver Margaret, Veterinary Medical Officer
