Type: RE-LICENSE INSPECTION
Date: 22-MAR-2024

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

***At the time of inspection there was no written program of veterinary care available for review. Lack of written veterinarian instructions can lead to missed medical prevention recommendations for health promotion to all animals. The applicant must have a written program of veterinary care as required.

3.53(a)(1)

Primary enclosures.

***In the Rabbit area, there was an enclosure containing two Rabbits. The front center brace board of the enclosure had been chewed completely through at the bottom leaving two screws exposed upward approximately 1". One of the Rabbits was observed chewing on one of the screws.
Sharp points and edges protruding into an enclosure create a potential injury for the animals within the enclosure. The applicant must remove the protruding screw ends and assure that enclosures are structurally sound and maintained in good repair to protect the rabbits from injury as required.

3.125(a)

Facilities, general.

***There was an enclosure that contained two Wallabies, two Cavies and four Chickens. There was a hole cut into the metal sheet so these animals could get into an enclosure in the barn. The bottom piece of metal had become detached and was bent outward into the outdoor portion of the enclosure, creating sharp points and edges.
Sharp points and edges protruding into an enclosure create a potential injury for the animals within the enclosure. The applicant must repair the detached metal and entrance area and assure enclosures are structurally sound and maintained in good repair to protect the animals from injury.

3.153(a)(1)(i)

Primary enclosures.

***In the garage, there was an enclosure containing one Scarlet McCaw that was blind. The perch was held on one end by wire. The end of this wire was protruding into the enclosure and the McCaw was observed attempting to chew on the wire.
Sharp points and edges protruding into an enclosure create a potential injury for the animals within the enclosure. The

Inspection Report

applicant must remove the wire ends from the enclosure and assure that there are no sharp points or edges in the primary enclosures as required.

This is a 1st Re-License Inspection for a Class C license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by May 21, 2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
