### 3.127(d)

#### Facilities, outdoor.

The three new enclosures added for the five Patagonian Cavies were built outside the 8 feet perimeter fence around the other regulated animals. Proper perimeter fencing three feet away from the primary enclosures is necessary to maintain unauthorized people and animals from entering the property. The perimeter fence also acts as a secondary containment system for the animals in the facility.

To be corrected by May 15, 2023.

This inspection and exit interview were conducted with Facility Representative.
