Certificate: **42-A-1024**
Site: 001
CHARLES PLUTA

Type: ROUTINE INSPECTION
Date: 15-SEP-2016

3.6(a)(1)

PRIMARY ENCLOSURES.

In the outdoor enclosure to the left of the pedestrian door against the small building housing three big dogs there was a standard poodle entangled around the neck and shoulders in the remains of a carpet remnant that had been used as a wind and rain break at the entrance of a shelter. The dog did not suffer any injuries and had all four feet firmly on the ground. The licensee was able to untangle the dog during the inspection, but the carpet remnant remained.

Materials in disrepair in a primary enclosure can lead to injury to the animals. While this animal was not injured in this instance, the potential of serious, if not fatal results, could occur from hazards, such as this within primary enclosures. Materials used in ALL primary enclosures must be suitable and kept in good repair.

TO BE CORRECTED BY: September 26, 2016

3.11(b)(2)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Throughout the facility there was build up of brown grime, and or organic material and debris effecting at least 42 adult dogs.

- ***floor and wall surfaces of the outdoor portion of the sheltered housing
- ***food bowls
- ***mats in the outdoor housing and outdoor portions of sheltered housing with dirt/gravel floors
- ***shelters in the outdoor housing and outdoor portions of sheltered housing
- ***the egress door in the enclosure on the back side of the house

The build-up of dirt, feces, and debris can harbor diseases. The licensee must spot-clean all used primary enclosures, and food and water bowls daily and sanitize at least once every 2 weeks and more often if necessary to prevent an accumulation of dirt, debris, food waste, excreta, and other disease hazards.

TO Be CORRECTED BY: September 30, 2016
