Type: ROUTINE INSPECTION
Date: 03-OCT-2024

3.28(a)(1)

Primary enclosures.

Approximately 10% of the guinea pig pens have wooden sides of the enclosures chewed, worn down, and have unsealed, exposed wood.

Chewed exposed wood is not impervious to moisture and cannot be properly cleaned and sanitized which can lead to disease spread.

Primary enclosures for guinea pigs need to be structurally sound, maintained in good repair, and be constructed of material substantially impervious to moisture.

Correct by: January 3, 2025

This inspection and exit interview were conducted with the licensee.
