

## Inspection Report

City And County Of Honolulu  
151 Kapahulu Avenue  
Honolulu, HI 96815

Customer ID: **3395**

Certificate: **95-C-0049**

Site: 001

CITY AND COUNTY OF HONOLULU

Type: ROUTINE INSPECTION

Date: 22-JUL-2018

---

**3.75(a) CRITICAL REPEAT**

**HOUSING FACILITIES, GENERAL.**

On 5/14/17 a young male chimpanzee escaped the primary chimpanzee outdoor enclosure, and was able to access an incompatible older male chimpanzee which was housed in the off-exhibit enclosure. There was a brief altercation between the two, during which the older male lost one half of its left middle finger. The younger male then entered the off-exhibit night house enclosure, and was secured by a keeper.

The same young male chimpanzee was able to escape from the primary enclosure in June, 2014. Zoo staff had made modifications to the enclosure to prevent any further escapes, but apparently these were inadequate.

Enclosures for non-human primates must be constructed in a manner so that they contain the animals securely, in order to protect the animals and the public. An enclosure that allows escape puts the animal and the public at serious risk.

Zoo staff has now added a prominent kick-in barrier at the top of the entire enclosure, with thirteen strands of electric wire, in addition to smoothing out the wall of the enclosure, to eliminate possible hand/foot holds. The facility should continue to monitor all enclosures to ensure that they adequately contain the animals housed within.

This inspection and exit interview were conducted with the zoo director.
