3.1(a)

HOUSING FACILITIES, GENERAL.

One of the outdoor kennels containing a mature male standard poodle and a smaller mature male mixed breed had a kennel wall section with the chain link pulled away and down off of the galvanized steel frame. The standard poodle could potentially escape or become entangled in the kennel through this defect.

The integrity of the kennel must be maintained to ensure the health and safety of the occupants within.

The licensee will correct this deficiency by 02/14/2020.

3.4(b)(3)

OUTDOOR HOUSING FACILITIES.

There were five (5) outdoor enclosures that contained shelters that did not have any wind or rain breaks at the entrance. Dogs within the shelters must be protected from wind and indirect rain.

The licensee will correct this deficiency by 02/14/2020.

3.4(b)

OUTDOOR HOUSING FACILITIES.

There were four (4) outdoor enclosures that did not contain adequately sized shelters large enough to accommodate each animal within that enclosure.

Outdoor enclosures must contain shelters large enough for each animal to enter and perform normal postural movements within. The licensee must provide more and/or adequately sized shelters.

The licensee will correct this deficiency by 02/14/2020.

This inspection and exit interview were conducted with the facility representative.
