Customer ID: **334276**  
Certificate: **23-C-0366**  
Site: 001  
GREEN HORSE FARM

Type: ROUTINE INSPECTION  
Date: 12-SEP-2023

---

### 3.150(a)

#### Facilities, general.

The ostrich enclosure does not have adequate measures to prevent the birds from escaping when someone enters the enclosure. The enclosure consists of woven wire mesh fencing attached to wooden posts. The entry point for someone entering the enclosure to provide food or water for the animals or attend to other husbandry duties is to open an outer segment of wire that is attached to an inner segment via wire clasps. This does not adequately secure the enclosure to prevent animals from escaping when someone enters the enclosure.

Failure to secure enclosures can result in animal escape which can lead to injury and/or lack of access to food and water. Housing facilities for birds must employ security measures that contain all the birds securely such as safety doors, entry/exit doors to the primary enclosure that are double door, or other systems designed to prevent escape of the birds. Correct by: October 10, 2023

### 3.152(b)

#### Facilities, outdoor

The enclosure housing 2 ostriches does not have any shelter to protect the animals from inclement weather. The ostriches are housed outdoors on grass with a wire mesh fence. There are some trees outside the fence along one border of the enclosure but they do not provide any shelter from inclement weather such as wind or rain. The birds are housed indoors during the winter but are currently housed outdoors.

Animals without adequate protection from inclement weather may suffer from stress, low body temperature, and decreased immune system function.

Outdoor housing facilities must provide adequate shelter for the local climatic conditions to protect the birds from any adverse weather conditions and must be large enough to comfortably contain all the birds at one time and prevent their discomfort from direct sunlight, precipitation, or wind.

Correct by: October 10, 2023

### 3.154

#### Environment enhancement to promote psychological well-being.

An environmental enhancement plan for birds that documents the appropriate provisions to provide enrichment and special considerations and is approved by the attending veterinarian has not been developed by the facility.

Failure to establish and maintain an environmental enhancement plan can result in birds not receiving adequate
