Type: ROUTINE INSPECTION
Date: 29-SEP-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

****Six adult dogs had excessive matting of their hair coat. There were clumps along the back and hips and numerous twists of the hair along the sides, legs and ventral area. The owner had begun shaving some of the dogs, however, the matted hair has been present for a period of time as indicated by the amount of matting and the severity of it. Matted, twisted hair can pull at the skin and cause discomfort and possible injury to the skin. The condition of the underlying skin under matted hair cannot be observed nor treated. Matted, twisted hair cannot insulate the dog for protection from the sun and temperature. The owner must ensure that the matted hair is removed. The owner must have a regular schedule of grooming to prevent matted hair.

A female Yorkshire Terrier (m/c 051-833-555) had matted tufts and twists of hair along the back legs and hips.
Male Yorkshire Terrier (m/c 075-850-572) had thickly matted clumps of hair over most of the hair coat.
Maltese (m/c 092-304-052) had twist of hair on the back legs and hips.
Yorkshire Terrier (m/c 051-801-866) had thick twists of hair on the back and sides.
Female Yorkshire Terrier (m/c 461-941-5519) had clumps and twists of hair on the hips, sides and back.
Female Yorkshire Terrier (m/c 462-63D-5D0) had clumps and twists of hair on the hips, sides and back.

TO BE CORRECTED BY: 8 OCTOBER, 2014

3.1

HOUSING FACILITIES, GENERAL.

(e) Storage

****Inside the whelp building was an unopened bag of dog food lying on the cement floor. Also in this area was shaved hair, spilled food and other debris. Food that is stored in an area with dirt, debris and other contaminants could become contaminated and lose nutritional value. The owner must store food in a manner that protects the supplies from spoilage, contamination, and vermin infestation. The supplies must be stored off the floor and away from the walls, to allow cleaning underneath and around the supplies. Foods requiring refrigeration must be stored accordingly, and all food must be stored in a manner that prevents contamination and deterioration of its nutritive
