Type: ROUTINE INSPECTION
Date: 21-MAY-2024

3.154(c)(4)

Environment enhancement to promote psychological well-being.

A single white-bellied caique (parrot) housed in the food prep building does not have the ability to see or hear other birds of its own or compatible species. This bird is a new acquisition to the bird collection that was previously under a prescribed veterinarian directed quarantine period (i.e. until May 1, 2024 or 20 days prior to day of inspection). The attending veterinarian clarified during a phone call on the day of inspection that she expected the transition from solo quarantine into a separate cage within the same housing area of other bird(s) would occur on May 1, 2024. Social birds may develop illness or symptoms of psychological distress when isolated from other birds of their kind or compatible species.

Correct by May 28, 2024 by following prescribed veterinary quarantine instructions and provide the caique visual and/or auditory stimuli to other birds of its own or compatible species.

This inspection and exit interview were conducted with facility representatives.
