ATLANTA FILM ANIMALS

Type: ROUTINE INSPECTION
Date: 06-MAR-2024

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The written program of veterinary care provided by the facility did not include the plan for the goats and sheep. The facility has consulted with different veterinarians on care for the animals when they were unwell, as was the case with the 8-year-old Nubian goat with a pre-existing condition, however, did not establish a complete care plan with the current attending veterinarian. Without a fully developed care plan and without full oversight by the attending veterinarian, animal health and well-being cannot be assured. In conjunction with the attending veterinarian, the facility must establish program of adequate veterinary care for the hoof stock that include a plan for animals with chronic conditions, as well as other aspects of care such as parasite control, vaccinations and methods to prevent, control, diagnose as well as treat diseases/injuries. If needed, the attending Veterinarian may consult with and advise Licensee to seek care from other veterinarians with regard to some health issues. Correct by March 29, 2024.

This inspection and exit interview were conducted with a facility representative.
