Certificate: 85-C-0034

Site: 001

WILD SPIRIT WOLF SANCTUARY

Type: ROUTINE INSPECTION

Date: 22-JUN-2016

3.127(a)

FACILITIES, OUTDOOR.

At the time of the inspection (mid day/full sun), there was limited shade available outside the shelter in the enclosure housing the five wolfdogs (Azteca #179; Katrina #177; Saint #176; Juno #178; Goldie #180). One animal in this enclosure was noted laying down in the small amount of shade available in the corner of the pen. Insufficient shade during the summer can cause overheating and discomfort to the animals. Additional shade must be provided to the five animals housed in this enclosure to protect them from direct sunlight. To be corrected by: July 8, 2016.

Shade is also an issue in the enclosure housing the 4 dingos (Aussie #214; Glacier #215; Kooyong #216; Uluru #213)

At the time of the inspection (mid-day), there was only a small amount of shade in one corner of their enclosure. One

of the four dingos was observed laying down in this limited amount of shade during the inspection. Insufficient shade

during the summer can cause overheating and discomfort to the animals. Additional shade must be provided to the four animals housed in this enclosure to protect them from direct sunlight. To be corrected by: July 8, 2016.

3.127(b)

FACILITIES, OUTDOOR.

There is one plastic igloo shelter in the primary enclosure for two wolfdogs (Nakota #154; Silva #193). The igloo is not large enough to comfortably house both animals. Insufficient protection from inclement weather can cause discomfort to animals housed outdoors. All animals kept outdoors must be provided adequate shelter to protect them and to prevent discomfort. To be corrected by: July 8, 2016.

Inspection accompanied by USDA, APHIS, Animal Care employees Cindy Rhodes, ACI and Dr. Tanya Tims, SACS and facility representatives. An exit briefing was conducted with a facility representative.
