The Nature of Wildworks

Type: ROUTINE INSPECTION

Date: 06-FEB-2024

3.153(a)(1)(i)

Primary enclosures.

Sharp points were found in the enclosure containing a Blue and Gold Macaw and a rooster. There were 3 wooden (2 by 4) perches that were broken leaving the entire metal support (joists) exposed. Two of the chain link walls had exposed points on the top of the wall. The shade cloth/mesh roof was attached to the outer section of 2 walls, leaving the top points exposed on the inside of the wall. On the other 2 walls, the roof structure was attached to the inner surface, effectively blocking the birds access to the sharp points of the chain wall. Both of the birds were free in the enclosure with access to the sharp points. The primary enclosure must be constructed and maintained so that they have no sharp points that could potentially injure the birds. The birds were removed from the enclosure during the inspection.

Correct by: 02/20/2024

3.154

Environment enhancement to promote psychological well-being.

The facility did not have a documented environment enhancement plan to promote psychological well-being of their avian species as required by the Animal Welfare Act. The facility must develop, document and follow a species appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan regulation and be in accordance with currently accepted professional standards.
