Type: ROUTINE INSPECTION
Date: 07-MAY-2015

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A female shiba inu with microchip number 941000013052495 is limping on her left rear leg. This dog is not putting weight on that leg while she is walking. The presence of limping may be due to an injury or other medical conditions and may cause pain for this dog.

A male Chinese pug with microchip number OAO1137624 has a cloudy right eye. The majority of this eye has a dry, rough appearance and there is some redness and a slight build-up of a material around the outer edge. Issues with the eyes may cause difficulty with the vision and can be painful.

These two dogs must be examined by a licensed veterinarian on or before 12 May 2015 to obtain an accurate diagnosis and treatment plan. This information must be documented in writing and made available to the inspector.

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

An enclosure in the whelping building housing two adult beagles had an excessive accumulation of dirt, grime and hair on the floor, corners, and walls of the inside portion of this enclosure.

A buildup of dirt and grime can create disease hazards.

The licensee must ensure all surfaces that come in contact with the dogs and all other surfaces in the housing facilities must be spot-cleaned daily and sanitized in accordance with 3.11 (b) of this subpart to prevent an accumulation of excreta, grime, and to prevent disease hazards, odors and pests. Correct by 8 May 2015.

The black male Pomeranian with microchip number 025 866 343 cited on the 23 Oct. 2014 inspection has been examined by the attending veterinarian and the condition has been corrected.

This routine inspection and exit interview were conducted with facility representatives as well as Lynn Clarke, ACI.
