### 3.15(a)

#### Primary enclosures used to transport live dogs and cats.

The registrant sometimes transports dogs in the vehicle without using a primary enclosure. The website for the business shows two dogs in the vehicle without a primary enclosure and the registrant admits they sometimes transport dogs that way. Not transporting a dog in a primary enclosure doesn't ensure the safety of that dog during transport. All dogs transported from here on out must be transported in a primary enclosure. Correct starting on 7/29/25.

This inspection and exit interview were conducted with the registrant.

Note: No animals were on site during inspection.

End of report.
