Certificate: **48-A-2061**
Site: 001
JOHN LEE BACKHUS

Type: ROUTINE INSPECTION
Date: 29-JAN-2016

2.50(a)(1)

TIME AND METHOD OF IDENTIFICATION.

* At least eight adult dogs had no official identification on them at the time of inspection. The licensee is currently using collar id on the dogs. Official identification is needed to ensure that each animal's identity can be known with certainty which helps to facilitate the inspection process. The licensee must ensure that all live dogs on the premise shall be identified by an official tag, a distinctive and legible tattoo marking that is acceptable to and approved by the Administrator or by a microchip chip number. If the licensee uses microchips then a microchip reader must be made available to the inspector at time of facility inspection and a variance must be maintained on file by the licensee. Correct by 2/29/16.

3.1(c)(2) REPEAT

HOUSING FACILITIES, GENERAL.

* Broken, missing pieces of cement were observed in the cement flooring in at least five outdoor enclosures housing seven dogs. Debris, straw and excreta were observed collecting in the affected cement flooring. Unsanitary conditions exist from a lack of cleaning of the surface area if dirt, debris, excreta or food waste is allowed to collect in the affected cement flooring. This could lead to a potential disease, contamination or health risks. The licensee must ensure all surfaces are maintained on a regular basis. Any surface that cannot be readily cleaned and sanitized, must be replaced when worn or soiled.

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

* An excessive amount of excreta waste was accumulating next to one outdoor enclosure housing two dogs. This indicates unsanitary living condition exists that could lead to potential disease or health risks. The licensee must ensure that excreta waste is removed away from the primary enclosure as often as necessary to prevent an excessive accumulation of feces and to reduce disease hazards, insects, pests and odors. Correct by 2/5/16.

* The facility inspection done on 1/29/16 and exit briefing done on 2/1/16 were conducted with the licensee.
