BIRDS & ANIMALS UNLIMITED

Type: ROUTINE INSPECTION
Date: 09-JUN-2015

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Program of Veterinary Care has not been updated to include all the species currently being held on the premises, such as the kangaroo, chipmunk and porcupine. The written program of Veterinary Care must reflect all species present on the facility and be approved by the attending veterinarian.

Correction date 9 July 2015

2.75(b)

RECORDS: DEALERS AND EXHIBITORS.

Disposition records were not readily available during inspection to indicate transport, euthanasia, sale or other disposition by the exhibitor for all animals. For example, records available stated: 1 red kangaroo was listed as "returned with Billy to Texas", with no further information provided, and 1 porcupine record indicated "Fred passed on".

Correct to ensure that accurate and complete disposition records are available at the time of inspection.

3.56(b)

SANITATION.

Outside rabbit hutch near gate: Rabbits have chewed and licked areas at the back of the hutch to expose the wood. The exposed wood can no longer be easily cleaned, or sanitized every 30 days as required to reduce disease risk. A system must be in place to ensure enclosures are maintained in good repair.

Correction date 9 July 2015

3.127(d)

Prepared By: JEANNE LORANG, A C I USDA, APHIS, Animal Care

Inspection Report

FACILITIES, OUTDOOR.

Kangaroo enclosure: New kangaroo enclosure is across from the house and has no perimeter fence. There must be a perimeter fence of at least 6 ft high surrounding the outdoor housing facility. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from access and so that it can function as a secondary containment system.

Correction date 9 September 2015

Exit interview conducted with facility personnel.

Additional Inspectors
