#### Environment enhancement to promote psychological well-being.

The facility does not have an environmental enhancement plan for the birds held by the facility.

Lack of a plan for environmental enhancement of birds can lead to psychological distress, feather plucking or other self injurious behaviors.

Dealers, exhibitors, and research facilities must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must be in accordance with the regulations in this subpart and with currently accepted professional standards as cited in appropriate professional journals or reference guides. This plan must be made available to APHIS upon request.

To be corrected by April 18, 2024

This inspection and exit interview were conducted with a facility representative.
