Type: ROUTINE INSPECTION

Date: 19-MAY-2015

2.33(b)(5)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

The evening dose of antibiotic was missed for "Pumba" on 5/15/2015. There was no adverse effect evident resulting from the oversight.

"Boo" was anesthetized and being prepped for a procedure when it was discovered that one drug for a three-drug cocktail necessary for the procedure was missing. The medication was obtained from an outside source by the time it was needed. There was no delay in the procedure, nor ill effect on the animal from the oversight.

Medication errors such as these could result in lack of effectiveness of a treatment regimen, or harm to the animal if procedures were prolonged while medications are procured. While there were no ill-effects at this time, a better system should be developed to ensure that medication doses are not missed, and that medications are available when they are needed.

Correct by close of business on 5/29/2015.

The inspection and exit briefing were accompanied by facility personnel.
