Jurassic Pets L L C
14615 Umpire St.
Brighton, CO 80603

Customer ID: **328593**
Certificate: **84-B-0131**
Site: 002
JURASSIC PETS L L C

Type: ROUTINE INSPECTION
Date: 06-NOV-2015

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Animals identified on the previous inspection of both sites to have veterinary conditions requiring examination, diagnosis, treatment plan, and resolution or follow-up evaluation by a veterinarian were no longer present at the facilities and no records were made by the licensee to show that the directions provided by the Attending Veterinarian (AV) on 9/23/15 were followed and that the veterinary conditions identified were resolved.

**A female juvenile hedgehog that was noted to be sneezing and lying on her side while the other juvenile hedgehogs were roaming throughout the enclosure during the previous inspection had been examined by the AV on 9/23/15. Oral antibiotic treatment was prescribed by the AV and this animal, along with another from this site, had been transferred to site 001 by the licensee for monitoring and administration of antibiotics but no records were made to show this was done and the animals had been sold by the licensee at the time of this inspection. There is no mechanism to determine that the animals were appropriately treated and had the veterinary condition resolved prior to release for sale.

**A female hedgehog from site 001 noted on 9/23/15 to have lost a significant amount of weight (13% of total body weight) was transferred to this site by the licensee and had not been monitored nor reweighed to determine if she had recovered. All four female hedgehogs on site were evaluated and weighed during this inspection. One female with pinto markings similar to the one seen at site 001 from Bin#43 on 9/21/15 and 9/23/15 weighed 390 grams which would be improved if this is the same animal but there was no mechanism or records by which this could be determined.

Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care.

Inspection and exit interview conducted with facility representatives and AC VMO, Tracy Thompson, DVM.
