Certificate: **93-R-0593**

Site: 001

Young Veterinary Research
Service

Type: ROUTINE INSPECTION

Date: 21-JUN-2023

3.6(a)(2)(ii)

Primary enclosures.

In 1-2 of the outdoor runs, the fence material had been damaged creating sharp points that could injure the dogs. In another 1-2 enclosures, the fence had been secured with metal pipe fittings that were left long and potentially could injure the dogs housed inside. These enclosures must be kept in good repair and constructed and maintained to remove the sharp points or edges to prevent injury to the dogs housed in the enclosures.

Corrected during inspection.

This inspection and exit interview were conducted with the Institutional Official.

Additional Inspectors:

William Campbell, VETERINARY MEDICAL OFFICER
