

## Inspection Report

Flicka Corp.  
12726 Dovetail Dr  
San Antonio, TX 78253

Customer ID: **33462**  
Certificate: **74-C-0777**  
Site: 001  
FLICKA CORP.

Type: ROUTINE INSPECTION  
Date: 23-NOV-2015

### 3.125(a)

#### FACILITIES, GENERAL.

There are 2 rolls of fencing , half of a metal round bale hay feeder and hay string on the ground in the goat/llama pens behind the house. There is an area on the fence line near the first goat shelter where the chain link fence has fallen off the wooden support board. The goats may catch their collars on or become entrapped on these items . The loose hay string poses a risk for the goats and llamas if it is ingested. These items must be removed from the animal housing areas and the fence maintained in good repair to prevent injury to the animals . CORRECT BY : 12-1-15

### 3.125(c)

#### FACILITIES, GENERAL.

There is a large amount of spilled feed scattered on the feed room floor . Feed was observed spilling from feed bags that have been damaged by rodents . Rodent droppings are on the floor and on the feed bags , One dead rat was on a glue trap . The room was in the process of being cleaned at time of the inspection , however the rodent control program must be intensified and a method of food storage developed to prevent rodent contamination of the feed. CORRECT BY : 12-1-15

### 3.127(b)

#### FACILITIES, OUTDOOR.

The recently acquired young pig named Charlotte was observed to be shivering at time of the inspection . She is housed in an enclosure with a large umbrella that provides shade and does have hay bedding to burrow into but this does not provide adequate shelter from predicted cold and wet weather. There are 2 shelters available to the 3 llamas housed with the goats behind the house but these shelters are not tall or large enough to accomodate 3 llamas. Adequate shelter from inclement weather must be provided to Charlotte and to the 3 llamas to afford them protection and prevent discomfort. CORRECT BY : 11-25-15

The inspection was conducted with a facility employee. The exit briefing was conducted with the employee and with the owner by phone at time of the inspection..
