Type: ROUTINE INSPECTION
Date: 16-JAN-2024

2.40(b)(2) Critical

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

At approximately 1pm on January 1st, 2024, an 8-year old intact male Red Kangaroo, "Sprocket" was found recumbent in his outdoor shelter, cold and not moving, though responsive. The animal care staff immediately moved Sprocket to a warmer area where he was offered water, monitored and allowed to warm up. Sprocket subsequently passed away that early evening without veterinary medical attention. Regarding seeking emergency medical attention, the facility representatives stated that being with it being New Year's Day, their veterinarian was closed and they did not call around seeking emergency care. They stated that they were planning to call their veterinarian as soon as offices were open the following day. The program of veterinary care must establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose and treat diseases and injuries, and the availability of emergency, weekend, and holiday care. Having emergency contacts are crucial to the animals receiving timely veterinary care in the event of an emergency on a holiday.

***Correct from 1/16/24 going forward

This inspection and exit interview were conducted with the facility representatives.
