Boston, MA 02121

Customer ID: **1973**

Certificate: **14-C-0001**

Site: 001

Commonwealth Zoological
Corporation

Type: RE-LICENSE INSPECTION

Date: 15-AUG-2023

3.80(a)(1)

Primary enclosures.

Enclosures housing ring-tailed lemurs are constructed with a coated concrete floor. There are areas of the floor surface that has lifted, cracked, or is missing entirely. In one pen, there is an area of approximately 4" x 4" where the floor coating has lifted off the underlying concrete. The material is broken at the top, exposing a lip of broken material and a pocket under the floor surface approximately 1" deep. In another pen, there is an area of approximately 6" x 10" where the flooring material is missing, exposing the underlying surface. The visible concrete is stained and dark in color beneath the disrupted coating.

In one holding enclosure for colobus monkeys, there is an area on the concrete floor where the material is cracked and lifted from the underlying material over an area of approximately 3" x 12" inches. There are visible gaps in the surface and some pieces of the concrete material appear loose.

Flooring material in poor repair creates areas that are difficult to clean and sanitize and loose flooring material may be hazardous to the animals.

To be corrected by ensuring that primary enclosures used to house nonhuman primates are maintained in good repair. Correct by 9/16/2023.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by November 7th, 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
