TROY & JODY GRANT

Type: ROUTINE INSPECTION
Date: 21-JUL-2015

3.125(a)

FACILITIES, GENERAL.

One of the metal chutes in the interior portion of one woodchuck enclosure is rusted to the point that there are sharp, jagged edges present. Sharp, jagged edges could injure the animals. All animal housing facilities must be constructed and maintained in good repair to protect the animals from injury. Correct by 4 August 2015.

3.127(d)

FACILITIES, OUTDOOR.

There are four free-standing enclosures housing 3 raccoons, 2 foxes, and 1 woodchuck that are located outside of the perimeter fence. The perimeter fence protects the animals from unauthorized persons and other animals as well as serving as a secondary containment system. All outdoor facilities housing regulated animals must be enclosed by a perimeter fence. Correct by 4 August 2015.

This routine inspection and exit interview were conducted with a facility representative and Kendall Lundy, ACI.
