Type: FOCUSED INSPECTION
Date: 03-JUN-2024

3.150(a)

Facilities, general.

The pen housing 3 emus had multiple sections of damaged chain link fencing on two sides, with exposed sharp ends of wire, and the bottom of the fence pulled up and into the enclosure, leaving an 8 - 12 inch high gap at the bottom. Wire ends may injure the birds, and the emus may continue to pull at the loose ends and bottom sections, leading to the risk that the enclosure might not contain the emus adequately. The facility must ensure that the enclosure is kept in good repair to protect the emus from injury and restrict other animals from entering the pen.

Correct by June 07, 2024.

This inspection and exit interview were conducted with the facility representative.
