Certificate:

Site: 001

Marek Lipold

Type: RE-LICENSE INSPECTION

Date: 20-JUN-2024

---

### 3.54(b)

#### Feeding.

The licensee stated that the rabbits' food receptacles are being cleaned weekly with water, soap, and a sponge only, without any sanitization. Unsanitary food receptacles can cause illness and disease in the rabbits. All food receptacles shall be kept clean and sanitized at least once every 2 weeks.

Corrected at time of inspection.

### 3.55

#### Repeat

#### Watering.

The licensee stated the rabbits' water bowl is being cleaned weekly with water, soap, and a sponge only, without any sanitization. Unclean and/or unsanitary water receptacles can cause illness and disease in the rabbits. All watering receptacles shall be sanitized when dirty and at least once every 2 weeks.

Corrected at time of inspection.

### 3.82(d)

#### Repeat

#### Feeding.

The food receptacles for the lemurs are hand washed with soap, water, and a sponge weekly without any sanitization product used, per the licensee. Therefore, the food receptacles are not being properly sanitized. Not sanitizing the food receptacles appropriately creates risk for contamination by excreta, pests and/or disease. Food receptacles must be kept clean and must be sanitized at least once every 2 weeks using one of the following methods: 1) live steam under pressure, or 2) washing with hot water (at least 180 degrees Fahrenheit) and soap or detergent, or 3) washing all soiled surfaces with appropriate detergent/disinfectant product that accomplishes the same purpose, with a thorough cleaning of the surfaces to remove organic material first, and then to provide sanitization followed by a clean water rinse, or as often as necessary to provide for the health and well-being of the animals.

Corrected at time of inspection.

### 3.83

#### Repeat

#### Watering.

## Inspection Report

---

The water receptacles for the lemurs are hand washed with soap, water, and a sponge weekly without any sanitization product used, per the licensee, Therefore, the water receptacles are not being properly sanitized. Not sanitizing the water receptacles appropriately creates risk for contamination by excreta, pests and/or disease. Water receptacles must be kept clean and must be sanitized at least once every 2 weeks using one of the following methods: 1) live steam under pressure, or 2) washing with hot water (at least 180 degrees Fahrenheit) and soap or detergent, or 3) washing all soiled surfaces with appropriate detergent/disinfectant product that accomplishes the same purpose, with a thorough cleaning of the surfaces to remove organic material first, and then to provide sanitization followed by a clean water rinse, or as often as necessary to provide for the health and well-being of the animals.  
Corrected at time of inspection.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by AUGUST 19, 2024, or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Since your existing USDA license has expired as of June 21, 2024, you cannot conduct any regulated activity until a relicensing inspection accompanied by an inspection report with no non-compliances is received, and your license is active again.
