Date: 26-MAR-2019

### 2.40(b)(2) DIRECT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\* A seven year old cream colored male Pomeranian, identification number 0A01565576. had an opaque, red left eye with a jelly like protrusion from the center. The right eye was slightly red and opaque. This can be a sign of illness or injury and be painful. The teeth had a heavy buildup of plaque with a creamy white discharge. This can cause tooth loss, dental disease and be painful. The dog must be evaluated by a veterinarian the licensee did schedule an appointment with a veterinarian at the time of the inspection.

Indirect

\*\* A seven year old black female Poodle, identification number 0A02435878. Had a soft mass the size of a plum at the end of the mammary chain. The mass was not hot and the dog did not show signs of pain when palpated. This can be a sign of illness or injury. The dog must be evaluated by a veterinarian to determine if treatment is necessary. The hair coat was extremely matted. Hair matting can be painful and cause skin problems. The dog must be clipped to remove hair matting and maintained. The dog is scheduled to see a veterinarian.

This inspection and exit briefing was conducted with the owner.

End of report.
