MISSOURI DOWN UNDER LLC

Type: ROUTINE INSPECTION

Date: 26-APR-2023

---

### 2.1(b)(2)(i)

#### Requirements and application

The licensee is currently authorized for a maximum number of 50 animals on hand at any single point in time during the period of licensure. Counting all regulated animals currently on the property or inventory, the total inventory is 54.

Licenses are approved based on the numbers and types of animals a facility can properly manage. If a facility plans to exceed its approved maximum number of animals, they are required to obtain a new license before any change that results in more than the authorized number of animals. The licensee needs to maintain the authorized number of animals or apply for a new license to account for the increase.

Correct by July 28, 2023

### 3.77(f)

#### Sheltered housing facilities.

The outdoor area of a sheltered housing facility containing two ring-tailed lemurs is not completely enclosed by a perimeter fence. The outdoor area of the enclosure has wire panel walls and roof, beyond which there is some additional fencing of various heights. However, there is not one continuous 6 feet tall perimeter fence. A perimeter fence is essential for restricting contact between exotic animals and unauthorized people or animals. A perimeter fence also acts as a secondary containment system in the event an animal escapes from its primary enclosure. The licensee must provide a

### 3.127(d)

#### Facilities, outdoor.

The primary enclosures containing two artic foxes, one serval and one Eurasian lynx is not completely enclosed by a perimeter fence. Around the primary enclosures there is some additional fencing of various heights. However, there is not one continuous 6 feet tall perimeter fence around the primary enclosures. A perimeter fence is essential for restricting contact between exotic animals and unauthorized people or animals. A perimeter fence also acts as a secondary containment system in the event an animal escapes from its primary enclosure. The licensee must provide a perimeter fence that is of sufficient height, as required by this section, to protect the animals in the facility and keep unwanted species out.
