ADEPT DIESEL SERVICE

Type: ROUTINE INSPECTION
Date: 04-MAR-2015

3.26(d) REPEAT

FACILITIES, INDOOR.

Interior Surfaces. There is still bare wood on the floor where the paint is scatched off in the guinea pig building. The interior surfaces including the floor must be conctructed and maintained so that the surfaces are impervious to moisture so that they can be readily cleaned and sanitized. Correct by ensuring that the areas on the floor where the paint is missing are resealed or covered with an impervious surface.

Remains uncorrected.

3.31(a)(1)

SANITATION.

Cleaning and sanitation of primary enclosures. There is a buidup of dirt and debris on the back side of the wire enclosures and on the rear support frames for the guinea pig breeders. Inadequate cleaning and sanitation exposes the animals to potential disease hazards such as bacteria, fungal, and viral diseases. Primary enclosures must be cleaned often enough to prevent an accumulation of excreta, soiled bedding, dirt and debris and must be sanitized at least once every 2 weeks. Correct by ensuring that all primary enclosures are kept clean to prevent and accumulation of dirt and debris and that enclosures are sanitized at least once every 2 weeks.

Correct by March 6, 2015

An exit briefing was conducted with the owner.
