CARVALHOS FRIENDS OF A FEATHER, INC.

Type: ROUTINE INSPECTION  
Date: 13-NOV-2014

---

### 3.80(a)(1)

#### PRIMARY ENCLOSURES.

A two-inch gap between the left front wood pole and the mesh wire of the gibbon enclosure was identified. The gap is wide enough that the animal was observed to extend its thoracic limb approximately twelve inches outside the primary enclosure. Primary enclosures for non-human primates must be designed and constructed to be sound and maintained in good repair. The gap should be repaired as soon as possible to avoid any potential physical contact between the animal and humans.

Correct by: December 13, 2014

Exit interview was conducted with a facility representative.
