3.1(c)(6)

HOUSING FACILITIES, GENERAL.

The gravel in a minimum of 4 of the outdoor enclosures was mixed with a brown substance that was soiling the dogs. There were standing puddles of a yellowish brown liquid. The dogs were wet and soiled and the conditions are conducive to harboring disease. Gravel floors must be raked or spot-cleaned with sufficient frequency to ensure all animals the freedom to avoid contact with excreta. Contaminated material must be replaced whenever this raking and spot-cleaning is not sufficient. TO BE CORRECTED BY: 11/ 8/2015

This inspection and exit briefing was conducted with the licensee.

The animals identified under 2.40b2 on the 9/5/2015 inspection have received appropriate veterinary care.
