LIVING TREASURE ANIMAL
PARK

Type: ROUTINE INSPECTION

Date: 22-SEP-2022

3.81(c)

Environment enhancement to promote psychological well-being.

The facility's environmental enhancement plan does not include special considerations for infant and juvenile nonhuman primates or nonhuman primates that are unable to see and hear other nonhuman primates of their own or compatible species. The facility is currently hand raising a juvenile ring-tailed lemur which is housed indoors adjacent to a sloth. During the inspection the animal appeared healthy, however, there were no special considerations documented for this juvenile, singly housed nonhuman primate.

Certain nonhuman primates at various life stages or in certain circumstances require special attention regarding environmental enhancement to ensure the psychological well-being of the animals when they are separated from a social environment.

Exhibitors, as directed by the attending veterinarian, must develop, document, and follow an appropriate plan for environmental enhancement which includes special considerations for infant and young juveniles and individually housed nonhuman primates that are unable to see and hear nonhuman primates of their own or compatible species.

Correct by: October 6, 2022.

This inspection and exit interview were conducted with facility representatives.
