FACILITIES, OUTDOOR.

Shelter from sunlight

A paddock containing two domestic dromedary camels as well as 6 oryx did not have adequate shade structures in place for the two camels. Two wooden three sided shelters are within this paddock but are not sufficiently tall enough to allow the camels access to this area without abnormal postural adjustments. Shelter for the sun must be made available for use in this paddock to reduce the potential for discomfort or overheating from the sun. To be corrected by: 06/25/14

This inspection and exit briefing was conducted with the designated person at this site. The report is to be sent to the owner via email.
