Certificate: 84-C-0019

Site: 001

THE WILD ANIMAL SANCTUARY

Type: ROUTINE INSPECTION

Date: 16-JUN-2014

3.125(a)

FACILITIES, GENERAL.

The chain link fencing between the adjacent tiger enclosures (one housing a male named Chase next to one housing a male named Mowgli and a female named Kiara) had become unsecured at the bottom. This poses a risk of injury to these tigers should a paw get caught on the sharp ends or a bite or scratch may occur if one of the tigers reaches into the adjacent enclosure.

A wooden spool in the enclosure housing 3 servals had the sharp end of a wood screw protruding from the top surface, posing a risk of injury to these cats.

The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

To be corrected by 6/20/2014.

3.131(c)

SANITATION.

The facility is maintaining a trash pit near the enclosure #31 housing 23 black bears and 2 brown bears. This pit has a strong odor and is attracting numerous flies around the enclosure. Flies can carry diseases and the waste in the pit may contribute to this risk since it is adjacent to the enclosure.

Accumulations of trash shall be placed in designated areas and cleared as necessary to protect the health of the animals.

To be corrected by 6/30/2014.
